fasciotens®Abdomen

The innovative therapy
for the open abdomen

www.fasciotens.com

FASCIOTENS HELPS WITH THE OPEN ABDOMEN

Increase opportunities, reduce risk

MEDICAL PROBLEM

- ⊖ Laparostoma as treatment of last resort
- ⊖ medial fascial traction not feasible
- ⊖ duration of therapy decides outcome
- ⊖ closure often not possible

THE SOLUTION

- ⊕ Confirmation of preclinical results in clinical use
- ⊕ Prevention of fascial retraction and stretching of fascial tissue
- ⊕ Abdominal closure much faster possible

It can be combined with vacuum therapy.

fasciotens®Abdomen

- ⊕ Easy integration with intensive care
- ⊕ No impairment of vitality and ventilation parameters
- ⊕ **fasciotens®Abdomen** enables immediate fascial closure even in cases of distinct intraabdominal pathologies
- ⊕ Application on awake patients without sedation possible

For further examples see:

A Development by Surgeons for Surgeons!

fasciotens®Abdomen was developed based on the general clinical experience of surgeons.
